

Renew Your Energy Contract Early

With oil prices at their lowest price in over 5 years at around \$50 a barrel now is a good time to think about renewing your electricity or gas contract as commercial energy prices have also fallen.

Many businesses are unaware that they do not have to wait until they are nearing the end of their contract to sign up for their next contract. Even if your contract is not due for renewal until 2017 many suppliers will be able to quote you a bespoke price now.

If the price they quote is not at the level you are budgeting for CUB (UK) Ltd can then use their [Energy Price Monitoring Tool](#) to track the market and let you know as soon as the price hits your budgeted price. This way they ensure you sign your next contract at the right price and at the right time.

If you would like to have a chat with someone about renewing your contract early or signing up to use CUB®'s Energy Price Monitoring Tool please call 01354 606848 or email us customer@cub.com
